REASONS FOR ALLOWANCE

Response to Arguments

Applicant's arguments, see Remarks, filed June 11, 2007, with respect to the rejection of claim 37 under 35 U.S.C. 102 are moot.

Applicant's arguments with respect to the rejection of claims 1, 5-12, 16 and 20-24 under 35 U.S.C. 103 have been fully considered and are persuasive. The rejections of claims 1, 5-12, 16, 20-25, 29, 33, 37 and 40 under 35 U.S.C. 103 have been withdrawn.

Allowable Claims

Claims 1-24, 27, 28, 30-32, 34-37 and 39 are allowed.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance: A thorough search of the prior art of record did not disclose any reference, alone or in combination with other reference(s) that teaches or fairly suggests the following: an absorbent article having an acquisition layer that is a three-dimensional apertured film and having at least one raised ridge extending towards said topsheet from said female side of said acquisition distribution layer (claim 1), an absorbent article having an acquisition distribution layer that is a three-dimensional apertured film having a total void volume space greater than $500 \text{ cm}^3/\text{m}^2$ (claim 24), or a method of avoiding a wetness sensation comprising the step of redirecting unabsorbed fluids wherein said redirecting step includes providing raised ridges that define channels (claim 37).

The closest prior art of record is the combined teaching of Ahr and Biagioli. The reasons for indicating allowable subject matter over Ahr in view of Biagioli have been described in detail

Art Unit: 3761

on page 8 of the Office action mailed January 11, 2006. With respect to amended claim 1, the combined teaching of Ahr and Biagioli does not teach an acquisition distribution layer having at least one raised ridge extending towards a topsheet from a female side as of said acquisition distribution layer, as such female side is defined in the disclosure. Additionally, with respect to amended claim 24, the instant disclosure provides criticality for a total void volume space greater than $500 \text{ cm}^3/\text{m}^2$ (see Fig. 14, ¶¶ 0076, 0077), whereas neither Ahr nor Biagioli teaches a particular total void volume space, only that such space exists, and it would not be obvious to one of ordinary skill in the art to modify the combined teaching of Ahr and Biagioli to obtain the claimed total void volume space.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion
